Oil dispensing flow meter

1. Meter cover
2. Four kinds of display unit: L. PT. QT. GAL
3. RESET Key: Turn on or zero
4. TOTAL Key: Total amount
5. Electronic display
6. Protective cover (on the bottom)

Oil dispensing flow meter		
Part No	Description	Quantity
SSR DOG	Digital oil gun	1
SSR 1/4FF-QCSET-BSP	1/4 flat face quick connects BSP set	1

Oil dispensing flow meter contains all items described above price is now £147.62 including postage and excludes VAT @ 20%

Characteristics

Combination of dispensing nozzle and flow meter for oil dispensing devices with oil pump whether air, electric or battery operated.

Keeping track of your top ups over a period of days, weeks and equipment using the digital screen with total, flow amount and actual volumes.

The device is the ultimate dispensing nozzle with flat face quick connectors set, flexible hose connections and digital display with trigger lock

Thanks to the design of the system this ensures contamination free oil dispensing and top up at all times. The system is never open to the atmosphere, the contents are always together and with the digital oil flow meter it can be used to detect the amount per top up and the overall use throughout the day.

The system allows for single hand operation and can be used with multiple oils and devices depending on your application.

Features

- Portable and acceptable for storage anywhere.
- Can be used on multiple devices.
- Flow meter can read in 4 different outputs.
- Flow meter can read total amount overall and current oil dispensed.
- Installed with flat face quick connector set for ease of use.
- Spill proof design.
- AAA batteries for flow meter easily changed for up to 800,000 litre runtime life.
- Automatic standby mode when not in use.
- Parameterize coefficient volume depending on oils viscosity.
- 1/2" connection for hoses.
- Fits Mcnaught BOP20 & 60 pumps.
- All parts available as spares.
- Easy to strip down and clean
