Oil Simple Oil sampling pump

Oil sampling pump 38mm		
Part No	Description	Quantity
SSR 38 -VSP	Sample pump	1

Sampling pump contains all items described above price is now £28.14 this excludes postage and VAT @ 20%

The price has increased due to raw stock price increases.

Characteristics

Combination of sampling vacuum pump and high quality materials means a superior sampling pump similar to leading manufacturer. Can be equipped with our 38mm bottles and adapters. Can be purchased to reduce or increase bottle connection sizes. Easy to clean and disassemble if it gets contaminated due to user error. Fits both 6mm and 8mm tubing as supplied and can be used in conjunction with our sample kit or stand alone. When used with our sampling method of pitot tubes and barbed connectors, also found in our sampling kits, the sample pump becomes a highly usable device. Found in our varnish, stosh hose and patch test kits as standard. The pump comes packaged and with instructions easy for a gift or for distribution, the pump can also be restored in the box for further use.

Thanks to the design of the Vacuum pump the 38mm 400 threads come as standard to suit our PET bottles and any other bottles with this thread. We also have adapters to reduce or increase from 38mm to whatever you have. We can also complete custom requests either as separate adapter or installation to the pump as a dedicated unit. Can be widely used in hydraulic components, hydraulic systems, hydraulic stations, cylinders, gearboxes, transformers, steam turbines, reactors, motors, engines, pumps, valves, hubs, filters, coolers, heating oil sample sampling and manual sampling of tubes, tubing, pipe joints, fuel tanks, pressure gauges, flow meters, seals, etc. In the recent incident of waste oil, the oil sampler can be used for sampling various edible oils such as edible oil, soybean oil, and palm oil.

Features

- Easy to replace products and spares.
- 38 400 thread as standard.
- Adapters available to suit your sizes.
- Lightweight and high quality means long life parts.
- Made from 6061 aluminium alloy material and the best engineering plastic.
- Paired with our magnetic stand it works well to support the pump whilst in use to allow for hands free sampling.
- Comes standard with cardboard case and instructions of how to use.
- Draw a vacuum in excess of 27 inches of Hg (Mercury).
- Repair kits are offered for all pumps and include Buna O-rings and flapper valve.
